

POWERON

POWERON Google Cloud VMware Engine Foundation

Streamline and scale your infrastructure management

Migrate your on-premises VMware to Google Cloud VMware Engine (GCVE) to simplify managing infrastructure, improve platform stability, and facilitate cost management. You'll reap the benefits of the scale of the Google Cloud with quick provisioning, all while continuing to use your apps in the cloud without changes to your existing tools, processes, and policies.

With **POWERON Google Cloud VMware Engine (GCVE) Foundation**, a dedicated SADA team of experts including a Solutions Architect, Project Manager, Cloud Engineer, and VMware Engineer will help you get started quickly on Google Cloud and optimize your organization's hybrid cloud adoption.

What to expect?

POWERON Google Cloud VMware Engine Foundation consists of 4 milestones in as few as 4 weeks:

Milestone 1: Discovery

Prepare for your hybrid cloud journey to Google Cloud with a custom cloud assessment.

Milestone 2: Implementation

Create the foundation for your GCVE infrastructure and migrate from existing data centers into Google Cloud and onto GCVE.

Milestone 3: Validation

Execute mutually agreed upon user acceptance testing (UAT) to validate the functionality of the virtual machine in GCVE.

Milestone 4: Hand-off

Personalized training and documentation provided by SADA sets you up for continued success.

Key deliverables

- / **GCVE deployment:** A working GCVE landing zone that can easily be rolled into production
- / **Cloud state architecture:** A diagram representing your Google Cloud Platform architecture
- / **Deployment plan:** Documents summarizing the implementation steps and GCVE object design
- / **Validation plan:** Conditions and methods of execution
- / **Google Cloud calculator:** Cost estimates for resources consumed by GCVE to support migrated environments

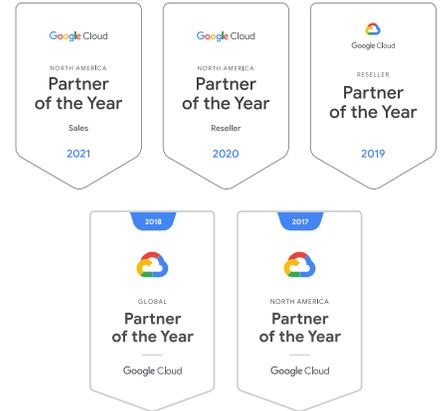

Partner with the best

At SADA, we climb every mountain, clear every hurdle, and turn the improbable into possible – over and over again. Simply put, we propel your organization forward.

It's not enough to migrate to the cloud, it's what you do once you're there. Accelerating application development. Advancing productivity and collaboration. Using your data as a competitive edge. When it comes to Google Cloud, we're not an add-on, we're a must-have, driving the business performance of our clients with its power.

Beyond our expertise and experience, what sets us apart is our people. It's the spirit that carried us from scrappy origins as one of the Google Cloud launch partners to an award-winning global partner year after year. With a client list that spans healthcare, media and entertainment, retail, manufacturing, public sector and digital natives – we simply get the job done, every step of the way.

“Our customers’ project managers are very performance conscious, and these actions can impact their productivity enormously. But because Google Cloud VMware Engine provides high-performance computing resources, we were able to migrate without negatively impacting customer performance.”
